Please cancel without prejudice, claims 1-20, and add claims 21-40 as indicated. This listing of claims will replace all prior versions and listings of claims in the application.

Claims 1-20 (Canceled)

21. (New)   A method for associating related information to personal information manager data, comprising the steps of:

selecting a data item in the personal information manager data for related information to be acquired;

acquiring the related information for the data item; and

providing the related information for the data item to the user.

22. (New)   The method of Claim 21, further comprises the step of:

computing differences between the related information and previously provided related information, and

providing the differences between the related information and previously related information to the user.

23. (New)   The method of Claim 21, further comprising the step of:

determining a device type of a remote device of the user; and

formatting the related information provided to the remote device.

24. (New)   The method of Claim 21, wherein the related information is selected from the group consisting of map data, weather data, flight data, hotel data, taxi data, and rental car data.

25. (New)   The method of Claim 21, further comprising the steps of:

sending an alert to the user if a alert condition occurs for the related information.

26. (New)   A system that associates related information to personal information manager data on a computing device, comprising:

a data acquisition module that acquires a data item in personal information manager data for related information to be acquired;

a related information acquisition module that acquires the related information for the data item; and

a output module that provides the related information for the data item to the user.

27. (New)   The system of Claim 26, further comprising:

a differences determination module that computes differences between the related information and previously provided related information, so only the differences are provided to the user.

28. (New)   The system of Claim 26, further comprising:

a type module that determines a device type of a remote device of the user; and

a format module that formats the related information provided to the remote device.

29. (New)   The system of Claim 26, wherein the related information is selected from the group consisting of map data, weather data, flight data, hotel data, taxi data, and rental car data.

30. (New)   The system of Claim 26, further comprising:

an alert module that sends an alert to the user if a alert condition occurs for the related information.

31. (New)   A computer readable medium for a logic that associates related information to personal information manager data on a computing device, comprising:

logic for selecting a data item in personal information manager data for related information to be acquired;

logic for acquiring the related information for the data item; and

logic for providing the related information for the data item to the user.

32. (New)   The system of Claim 31, further comprising:

logic for computing differences between the related information and previously related information, so only the differences are provided to the user.

33. (New)   The system of Claim 31, further comprising:

logic for determining a device type of a remote device of the user; and

logic for formatting the related information provided to the remote device.

34. (New)   The system of Claim 31, wherein the related information is selected from the group consisting of map data, weather data, flight data, hotel data, taxi data, and rental car data.

35. (New)   The system of Claim 31, further comprising:

logic for sending an alert to the user if a alert condition occurs for the data item or related information.

36. (New)   A system for associating related information to personal information manager (PIM) data, comprising:

means for selecting a data item in personal information manager data for related information to be acquired;

means for acquiring the related information for the data item; and

means for providing the related information for the data item to the user.

37. (New)   The system of Claim 36, further comprising:

means for computing differences between the related information and previously provided related information, so only the differences are provided to the user.

38. (New)   The system of Claim 36, further comprising:

means for determining a device type of a remote device of the user, and

means for formatting the related information provided to the remote device of the user.

39. (New)   The system of Claim 36, wherein the related information is selected from the group consisting of map data, weather data, flight data, hotel data, taxi data, and rental car data.

40. (New)   The system of Claim 36, further comprising:

means for sending an alert to the user if a alert condition occurs for the data item or related information.
